Forming a union has long been recognized as a way to increase power and influence and amplify one's voice to the voice of many. The name of this country is the United States so union must be a good idea and everyone has a vote in that union by right. To deny or abridge that right is an attack on our form of government and since the NLRB was created and the right to form labor unions and bargain collectively was recognized, any attempt to deny or abridge the right of labor unions to vote is also an attack on our laws. The right to vote on any matter by any community or organization should be protected. Those voices should be heard and attempts to weaken or silence them are acts of suppression and should be recognized as such. It should be easy to vote and not harder--- no matter the situation.

Union action is the only leverage we have as workers in education, trucking, service industries, etc. to force equity in benefits, wages, working conditions. As a retired teacher, without our union actions in the 80's and 90's, I would currently not have enough to live on with adequate benefits. However, at less than \$40,000 a year means that I do not take continental vacations, have house help and gym membership, etc. Adequate, but certainly not middle class.

Any changes should remove not add more obstacles that stand in the way of workers' freedom to vote. A lot of blood has been spilled over the years to gain the protections for workers to organize. Weakening these protections will not only cause more blood to be spilled, but would destabilize America from the inside out. Enemies of America love it when Americans create dissension from within, and that is exactly what weakening protections for workers to organize would do. American workers' wages have been stagnant for decades, but their financial burdens continue to grow. Do not weaken rules for peaceful negotiation of workers' issues. Our Communist enemies believe America crushes its workers. Do not turn that rhetoric into reality.☪æ
